

Specialist High Skills Major – Agriculture

It is clear that agriculture plays a major role in the lives of many families connected to Holy Trinity Secondary School. As a result, students will now be given the opportunity to enroll in this specialist high skills programme and learn about many different areas of agriculture while completing their regular studies.

The SHSM is a specialized, ministry-approved programme that allows students to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD).

These programmes enable students to gain sector-specific skills and knowledge in engaging, career-related learning environments, and prepare in a focused way for graduation and post-secondary education, training, or employment.

Students who are enrolled in the programme will complete sector-recognized certifications and or training courses as well as be part of career exploration activities such as field trips and hearing from expert guest speakers.

Agriculture Sector-Recognized Certifications and Training

| Three (3) compulsory | | | |
|---|--|--|-------------------------------|
