

This club was brought to fruition by a group of grade 6 students who love everything to do with science and were looking for an alternative to intramural sports. Under the direction of a teacher, students in grades 3 – 6 spend a portion of their recesses carrying out science experiments. This club has been a huge success.

**Experimenting with homemade “goo”**

**Using a balloon with a compact disc students test the theory of velocity and acceleration: Who can travel the furthest?**
