It is that time in your child's school life when you have the opportunity to decide on the intensity of French instruction that your child will receive. You may choose the French Immersion Program.

We encourage you to discuss this very important decision with your child's homeroom and Core French teachers.

What are the Goals of the Immersion Program?

Students who graduate from the French Immersion Program in fifth grade should be able to:

- ✎ Understand, speak, read and write French with a high level of language proficiency. Listening and reading skills should be near native-like.
- ✎ Perform on standardized achievement tests in English as well as or better than their monolingual peers.
- ✎ Successfully continue their studies in both English and French at the intermediate/ middle school level.
