

## Board Wide Opening Session:

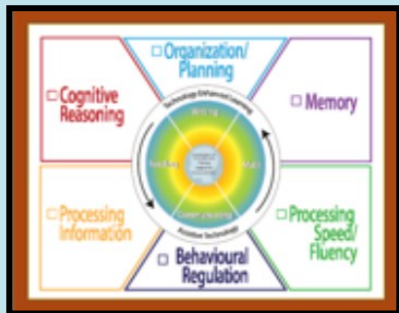

This **Learning for All** session will introduce the key messages for the day and highlight the importance of how the various approaches taken by educators can engage and motivate students while meeting their diverse learning needs in math and across all disciplines. This session will showcase some inspiring examples of how increasing our understanding of growth mindset and how purposefully using tools and strategies can help students succeed.

## Session A: Modelling Learning Processes:

When we explicitly model and teach the learning processes, we encourage students to share and collaborate which increases their **Thinking, Application and Communication skills**. This workshop will share how this gives students a voice and provides a variety of ways to help them think about, represent and communicate their thinking in all subject areas.

## Session B: Supporting Student Processing:

In this interactive workshop we will explore how each students' profile impacts on their engagement in the learning process and how accessing different supports and strategies allows students to move their thinking forward. This information is shared through the new *Mathematical Learning for All* magazine.

## Session C: Developing Growth Mindset:

Developing a Growth Mindset enables students to approach math and other subjects with curiosity and confidence as it allows them to feel more capable to take risks and problem solve. Teachers will share examples of how students are supported to try new approaches, to share their thinking, and develop their skills to persevere and embrace new opportunities for learning.

\* Following the Opening Session, participants will rotate through the three interactive workshops as identified on the information on the back of their name card.

# April 27th, 2018

## Mathematical & Learning for All Agenda

**9:00-10:15:** Welcome/Liturgy of the Word  
Board wide Opening Session

**10:15-10:30:** Nutrition/Body Break

**10:30-11:30:**

Session A: Group 1: Modelling Learning Processes  
Session B: Group 2: Supporting Students Processing Math  
Session C Group 3: Developing Growth Mindset

**11:30-12:30: Lunch**

**12:30-1:15:**

Session A: Group 3: Modelling Learning Processes  
Session B: Group 1: Supporting Students Processing Math  
Session C Group 2: Developing Growth Mindset

**1:15-2:00:**

Session A: Group 2: Modelling Learning Processes  
Session B: Group 3: Supporting Students Processing Math  
Session C: Group 1: Developing Growth Mindset

The new *Mathematical Learning for All* magazine will be released, which is the seventh magazine in a series of *Learning for All* resources developed by the Special Education Department.

School Name	Site to attend
<b>St. Thomas Aquinas CHS, Russell</b>	<b>St. Thomas Aquinas CHS, Russell</b>
